Profile

Graduated in Software Engineering with 3 years experience in front-end and full-stack web development, I have skills in frameworks such as React, Angular and Laravel. I have experience working with UI components libraries, global state management, and Git/GitHub. I am knowledgeable in testing methodologies such as Jest, and experience with databases, such as MySQL. My adaptable and analytical thinking allows me to effectively self-manage during independent projects, as well as collaborate effectively in a team setting.

Hard-skills

- JavaScript / TypeScript
- React.js
- Angular
- Testing (Jest)
- Accessibility
- Laravel
- Global State Management
- HTML5 / CSS3
- UI Components Libraries
- Git / GitHub

Soft-skills

- Analytical Thinking
- Adaptability
- Time management
- Teamwork

Work Experience

Freelancer   *May 2023 - Currently, Brazil*

- Developed a custom landing page to meet the needs of a client in the boiler services and maintenance industry.
- Created an application with Electron + React for a client in the boiler services and maintenance industry.
- Developed projects according to client's specifications and needs.
- Maintained transparent communication with clients.
- Gathered feedback from clients to ensure their satisfaction with the delivered projects.

React.js · HTML5 · CSS3 · SASS · TypeScript · JavaScript · Electron

Front End Developer - Ímpar   *Jan 2022 - Apr 2023, Brazil*

- Played a key role in developing the front-end side for an internal messaging system connecting staff, which was utilized by various local companies to enhance communication and collaboration among their teams
- Successfully implemented a new feature that allowed teams to create surveys using adaptive cards, streamlining the feedback gathering process and improving overall efficiency
- Utilized Agile methodologies and collaborated closely with teams to ensure timely and efficient delivery of projects.

React.js · HTML5 · CSS3 · SASS · TypeScript · JavaScript · Scrum · Bootstrap · Syncfusion

Full Stack Developer - FGS   *June 2020 - Dec 2021, Brazil*

- Designed and developed the company's website, including both front-end and back-end using Laravel and MySQL, resulting in a professional and user-friendly online presence.
- Successfully integrated several third-party APIs, including Inter bank, Juno bank, and an API for issuing invoices, resulting in improved efficiency and automation of key business processes.
- Worked closely with the product team to understand requirements and provide technical input, resulting in a better alignment between business objectives and technical solutions.

React.js · Angular 10 · HTML5 · CSS3 · SASS · TypeScript · JavaScript · Laravel · MySQL · Angular Material

Education

Bachelor's Degree in Software Engineering, Universidade Católica de Petrópolis   *Jan 2016 - Dec 2020, Brazil*

During my Bachelor's degree, I gained extensive knowledge and practical experience in various aspects of software engineering, including software development, data structures and algorithms, computer networks, and software testing. I also had the opportunity to participate in several group projects, which honed my teamwork and communication skills.

Web Developer, Le Wagon   *Apr 2022 - Sept 2022, Brazil*

I completed a rigorous and comprehensive full-time web development bootcamp at Le Wagon, where I learned modern web development practices and technologies, including HTML, CSS, JavaScript, Ruby on Rails, and React.js. The program also emphasized the importance of project management, collaboration, and communication skills in the tech industry.
